A "Thermatic" Fireless Cooker Will Reduce Your Fuel Bills

Twenty minutes' to a half-hour's flow of gas from one small top burner will heat two "Thermatic" Radiators sufficiently to thoroughly cook a six-pound roast. The large oven burners of a gas range consume that much gas before the oven is warm enough to start roasting.

The "Thermatic" Cooker Roasts, Bakes, Boils or Stews Anything

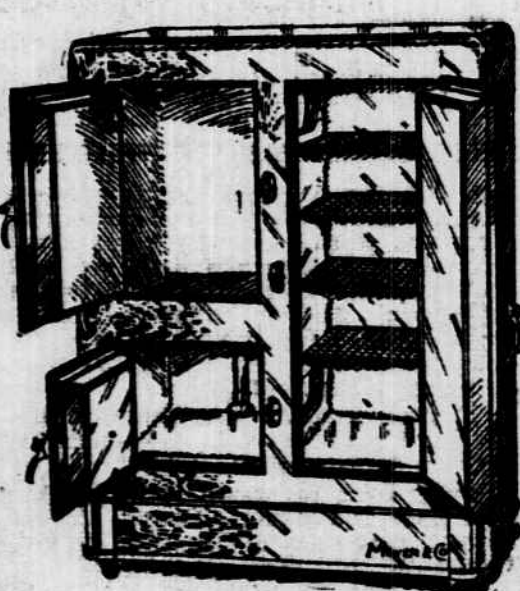

It will cook any meal more deliciously than is possible on a gas range or a coal range—and without the bother of watching to prevent cooking dry or burning. Food from the "Thermatic" Fireless Cooker retains its original tasty flavor, loses hardly any weight in cooking, and is most easily digested.

Deaf Mute Was Put on Jury.

PHILADELPHIA, April 3.—A new trial was granted in common pleas court yesterday after it had been discovered that a deaf mute had sat as a member of the jury during the hearing of an ejectment suit. How the man became a member of the jury and why he sat through the trial unable to hear or speak is a mystery which none of the court attaches could explain.

Rev. John E. Eggert was installed as pastor of the First Presbyterian Church at Chesapeake City, Md., Tuesday evening.
